THE TOTAL SOLUTION® IN POWER STEERING

ELECTRIC POWER STEERING

Belt Kits

Edelmann® Electric Rack and Pinion Drive Belt Replacement Kits offer a cost-effective solution for worn electric power steering belts. The kit includes all components for thorough repairs without full rack replacement. It provides a critical service option where replacement racks are scarce.

Tools

Chamfer ring tools make EPS belt replacement easier and safer. These precision tools ensure efficient chamfer ring removal and installation.

Couplings

Our replacement couplings provide a cost-effective, easy-to-install solution that supports column-assist and pinion-assist steering repairs in the aftermarket.

EDELMAUNN®

EPS

EDELMAUNN®
COMMITTED TO OEM FORM, FIT, & FUNCTION®

Precision Engineered for Perfect Fitment

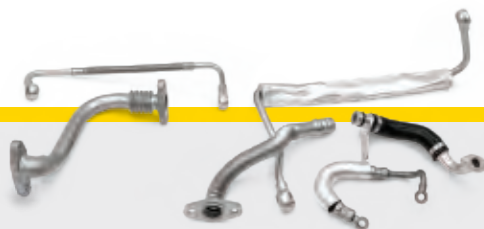

Edelmann® power steering hoses are precision engineered to meet or exceed OEM specifications, guaranteeing a seamless fit with a wide array of vehicle makes and models. This minimizes installation time and eliminates the risk of fitment issues or leaks, enhancing customer trust and loyalty.

Crafted with Premium Materials

- Heat/abrasion shields and high-temp guards protect against engine hot spots
- Double bead lock crimp prevents leakage
- Restrictors, stone guards, switch sockets per OE
- Movable mounting brackets accommodate real-world conditions

Power Steering Repair Kits

Repair kits contain high-quality bearings, gaskets, and seals tailored to specific repair needs. Complete seal kits feature PTFE seals, rubber seals, O-rings, and washers for thorough rebuilds.

Turbocharger Oil Lines

- Coverage for over 34 million vehicles in a broad range of applications from heavy duty trucks to small compacts
- Complete kits with turbo feed or return lines, gaskets, fittings, and seals for easy installation

EDELMANN ELITE

**DESIGNED BETTER
TO REDUCE WARRANTIES**

Unmatched Coverage, No Core Hassles

Edelmann Elite® offers coverage for a wide range of applications, providing you with competitive options over dealer-sourced parts. As **100% NEW** components, there are no core returns or charges to deal with.

- Exceeds OE specifications
- Strengthened gears prevent cracking, enlarged pistons endure extreme loads
- Upgraded seals prevent fluid seepage and debris
- Packaging earns praise for exceptional quality

6038PX 200926103

PART NUMBER BUILD DATE (YYMMDD) DAILY TEST & BENCH NUMBER

A standout feature is the unique Designated Numeric Asset® (DNA) identification number for complete product traceability. Each part receives a 100% test inspection report, confirming unparalleled quality and authenticity. This report, included with each purchase, verifies the precision of our new parts over remanufactured, reducing comebacks caused by deteriorated cores. Our test-verified excellence means greater satisfaction and eliminates warranty concerns.

Available Technologies

Edelmann Elite® offers hard to replicate technologies such as Magnasteer-Style and Variable-Steering rack and pinion assemblies that make for more comprehensive coverage than other programs.

CONQUER

EXTREME CONDITIONS

WITH HIGH PERFORMANCE POWER STEERING HOSE

- **10X** more corrosion resistant for higher resistance to degradation
- **4X** better impulse durability for superior pliability in extremely cold temperatures down to -40°
- **2X** less swelling for more resistance to hose cracking

The epitome of power steering hose innovation. Designed with advanced engineering techniques and an enhanced rubber formulation, Edelmann Elite® hoses excel in extreme temperatures, from freezing polar vortex conditions to scorching heatwaves.

OEM Form, Fit, Function

Maintaining OE specifications, Edelmann Elite® coolers deliver unmatched performance with precise form, fit and cooling. Our innovative single tube construction prevents failures while braising provides durability.

- Direct replacement brackets simplify installation
- Proper fin designs ensure ideal cooling
- Essential turbulators maintain fluid temp
- E-coating resists corrosion for long product life
- Precision OE cooling, every time

Universal Cooler

In applications where the OE has not provided a power steering cooler, we bring OE quality to a universal application. Equipped with sturdy, universal mounting brackets for expert and secure installation virtually anywhere needed, the Edelmann Elite® universal cooler offers a more confident option to the aftermarket.

Kits Include:

Hoses
Mounting Hardware
Hose Clamps

Protect the Repair

The Edelmann Elite® universal power steering filter prevents premature failure and protects sensitive components from damage. Its versatile design fits various hose sizes while compact shape integrates seamlessly.

- Interchangeable end fittings guarantee fitment on any power steering system with 3/8" (9.5mm), 1/2" (13mm), and 5/8" (16mm) return lines
- Dual filtration captures metal and non-metallic debris
- Higher capacity removes more particulate
- Serviceable - remove and clean the filter instead of replacing the unit

- Specially formulated for domestic and foreign power steering systems
- Increased temperature range to ensure greater system protection

PREMIUM FULL SYNTHETIC FLUIDS

The **TOTAL SOLUTION** In Power Steering

100 YEAR / 1,000,000 MILE WARRANTY

COMPLETE THE JOB

WITH OUR

POWER STEERING BUNDLES

Industry First and Only Complete Bundles

We've eliminated the guesswork. Utilizing our proprietary Edelmann Analytics® technology and Total Solution® product offering, we've created thousands of application-specific bundles that deliver every component needed for complete power steering repairs.

Each bundle contains exactly what the job requires: pump, rack or gear, cooler (when applicable), pressure and return hoses, filter, and fluid.

No wrong parts. No incomplete repairs.

Complete power steering repair revolutionized.
